

Wilson Mohr, Inc and Arkema

Wilson Mohr played two primary roles during the WCI field trial.

- Site Specific Project Manager: Wilson Mohr developed the project schedule, and worked closely with the WCI and Arkema to ensure that all project milestones were on scope, and on time.
- System Integrator: Wilson Mohr designed, configured, staged, and deployed the wireless network, and then integrated the wireless network into the host system.

About Wilson Mohr

- Since 1965 Wilson Mohr has been providing process control solutions to the industrial automation world, and over the past seven years Wilson Mohr has been strategically combining those years of process knowledge with industry leading wireless expertise to deliver a unique framework of wireless solutions.
- Nearly two years ago, Wilson Mohr began developing a new business unit (WMW) in anticipation of an impending wireless revolution within the automation world. WMW (Wilson Mohr Wireless) is dedicated to providing their customers with an extensive offering of wireless products and services, complimenting the company's more traditional process control and instrumentation businesses.
- Wilson Mohr currently has over 130 employees serving their customer's around the world.
- Wilson Mohr provides products and services to several industries including Chemical, Oil & Gas, Petrochemical, Utility, Pulp & Paper, Municipal, and Commercial Building Development.
- Wilson Mohr has the financial strength to handle turn-key projects in excess of \$10M in size, and they partner with a large array of wireless manufacturers to ensure that their customer's needs are always met without compromise.
